PROFILE

Monash Master of Data Science graduate with a business management and research background, seeking graduate data analyst, junior data scientist or business analytics opportunities. Combines analytical methods with operational research, stakeholder communication and team coordination.

CORE CAPABILITIES

Analysis: Python, SQL, R, pandas, NumPy, PostgreSQL, exploratory analysis, statistical testing and data quality.
Modelling: scikit-learn, regression, classification, Random Forest, XGBoost, feature preparation, cross-validation and error interpretation.
Visualisation: R Shiny, Plotly, Leaflet, ggplot2, Tableau and Kibana.
Data workflows: Apache Airflow, PySpark, Spark SQL and distributed processing concepts.
Business: problem framing, requirements gathering, process improvement and stakeholder-facing communication.

SELECTED DATA AND PRODUCT PROJECTS

CogniCompass - student wellbeing platform

Monash University | FIT5120 team project | 2026

- Contributed product thinking across dashboards, habit tracking, reminders and rewards, alongside database support, privacy considerations and communication for students aged 18-24.
- The live team product connects sleep, activity, screen exposure and social connection with reflection and engagement. Portfolio case study distinguishes personal contributions from team delivery.

Industrial emissions - interactive dashboard

Monash University | R Shiny, Plotly, Leaflet | 2025

- Designed and developed narrative visualisations using National Pollutant Inventory emissions and separate Water Account views, including maps, filters and industry-to-substance flows.
- Applied What-Why-How and detail-on-demand principles. Portfolio evidence distinguishes reported emission mass from measured water quality.

Wine quality - model comparison

Portfolio project | Python, regression and model evaluation | 2024

- Prepared physicochemical measurements and compared regression models. Saved tuned Random Forest output records a test MAE of 0.558 score points; examined the training/test gap and evaluation limits.

EV registrations - data pipeline

Portfolio project | Python, Airflow, PostgreSQL, Elasticsearch, Kibana | 2024

- Developed a DAG for ingestion, cleaning and indexing, with saved Kibana analysis views. Documented duplicate ingestion, missing-value handling and reproducibility improvements.

Further work: PySpark building-energy modelling; chronological stock baselines; NLP intent classification; data-quality audits; financial and statistical analysis. Case studies, source links and notebook downloads are available in the portfolio.

M. Gifhari Heryndra

Experience, education and community leadership

PROFESSIONAL EXPERIENCE

Research and Development Manager | PT Meta Sifi Semesta

Banjarmasin, Indonesia | October 2021 - January 2023

- Analysed operational and business challenges for energy and mining-related clients, developed 3+ improvement solutions and led four researchers.
- Delivered process and innovation initiatives with approximately IDR 250 million in annual savings and an average client operational cost reduction of approximately 10%, as reported in my supplied CV. Approximately IDR 500 million in further efficiency gains was projected.
- Prepared project documentation and stakeholder recommendations, working with PLN power-generation units and mining partners including Arutmin Indonesia and Multi Tambangjaya Utama.

Kitchen Helper | Sana Cafe

Melbourne, Australia | January - March 2026

- Supported food preparation, plating, stock rotation and kitchen setup while maintaining hygiene and food-safety routines.

Front-of-House / All-Rounder | Hutanika

Bandung, Indonesia | January - June 2024

- Supported busy service shifts through POS transactions, cash and EFTPOS handling, split bills and customer communication; monitored seatings, spend per cover and wait times.

EDUCATION AND ADDITIONAL TRAINING

Master of Data Science | Monash University

Melbourne, Australia | 2024 - 2026 | Graduated 15 October 2026

Bachelor of Management | Brawijaya University

Malang, Indonesia | 2016 - 2021 | GPA 3.28/4.00

Bachelor of Business and Commerce | University of Southern Queensland

Toowoomba, Australia | 2018 - 2019 | Double-degree programme with Brawijaya University

Hacktiv8 - Data Science Program | March - July 2024
Purwadhika - Data Analysis Program | August - December 2021

LEADERSHIP AND COMMUNITY

President | PPIA Monash

Melbourne, Australia | 2025 - 2026

- Coordinated partnerships, stakeholder communication and event delivery within an Indonesian student organisation of approximately 800 members.
- Contributed to speaker coordination, delegation communication, sponsorship support and execution for the Australia-Indonesia Networking Forum, which brought together 300 Indonesians in 2026.
- Supervised a Commbank career-preparation visit, PwC career discussion, investment conversation with Lo Kheng Hong and a community fundraising fun run.

SELECTED CREDENTIALS

HackerRank Python (Basic) and SQL (Basic) | May 2024
